

FOSTEX PD6 MULTI-TRACK RECORDER & EX12 DOCKING STATION

The PD6 records up to 6 tracks of BWF digital audio with time code. It can record sampling frequencies up to 96 kHz with 24 bit quantization. It records the audio to an internal hard drive or to an 8 centimeter DVD-RAM disc. The unit also has an analogue mixer built in for instant mix down recordings. It has a firewire port for offloading tracks to a PC. Our units have a USB keyboard included for entering metadata, and a small snake for Comtek mix outs. They come in a Pelican case, and lithium-ion batteries with charger/power supply are also included.

If you're going to be working from a sound cart, MidCan also has the EX12 Docking Station to extend the capabilities of the PD6. This adds another 40GB hard drive and full size DVD-RAM drive, giving you auto-backup and mirroring options. This unit can also plug into wall current and then power the PD6.

PD6 PACKAGE \$125 EX12 \$50 8cm DVD-RAM MEDIA \$20

COMTEK IFB SYSTEM

We can supply a package of M-216P7 transmitters and PR-216 receivers for feeding production sound to multiple persons. We also can supply a smaller kit with 1 Transmitter and 3 Receivers for EFP camera field monitoring.

TRANSMITTER \$20 RECEIVERS \$15 PACKAGE OF 1T, 10R \$150

EFP KIT - 1 transmitter, 3 receivers, headphones and cables \$60

AMBIENT ACL202CT & ACC501 CLOCKITS

For better or worse, keeping everything in sync has become the audio person's job these days. The 202CT is commonly referred to as a "Clockit" box. It captures TC from your master source, and then transfers that matched TC and trilevel sync to another device (usually a HD camera). They run for hours on a 9 volt battery. This allows your camera to roam with no umbilical, and there is no possibility of dropout as with wireless TC devices.

The ACC501 is a much more involved device. It can act as a master unit for the other Clockits, interface with computer systems over USB, get accurate time from GPS signals and more. It has a built in LCD and runs off 4 AA batteries.

CLOCKIT \$50 ACC501 \$125

AMBIENT 301 & DENECKE TS-3 TIME CODE SLATES

Both brands come with adaptor cables to get a signal in, have large red LED displays and both run off AA batteries. The Ambient units come with transmitters and are capable of wireless operation.

AMBIENT \$65 DENECKE \$65 2 DAY WEEK
