

As more and more cameras record to memory cards, the problem of how to store and archive the “ones and zeros” has grown. For most producers, the only practical solution has been to layoff the media to portable external hard drives. To accommodate that need, MidCan is now offering Fujifilm’s Rocstor line of hard drives. These are high quality drives in various capacities, at very reasonable prices. Just another way that MidCan gives you more.....

## ARCTICROC 2T

SIZE	INTERFACE	SPEED	GIGS	PRICE
2x3.5"	RAID - FW800/FW400/ USB/eSATA	7200	2 TB	\$460.00

These drives can use RAID level 1, 0 or JBOD. RAID 1 provides mirroring for redundant backup, but halves the drive's capacity. The RAID level is set via a mode switch, which simplifies RAID management. There is no IT expertise needed to manage the RAID, and no software to install. The 2 internal drives are hot-swappable.

## ARCTICROC 4T

SIZE	INTERFACE	SPEED	GIGS	PRICE
4x3.5"	RAID - FW800/FW400/ USB/eSATA	7200	6 TB	\$1349.00

These drives can use RAID level 5, 1, 0, or 0+1. The RAID level is set via a mode switch, which simplifies RAID management. There is no IT expertise needed to manage the RAID, and no software to install. RAID 5 can use all 4 internal drives, or 3 drives with a HotSpare. The 4 internal drives are hot-swappable.
